

ClaraClean<sup>TM</sup>

WASH & GO!

NEW  
dry  
CLOTH

## Revolutionary washing and preparation solution for modern cleaning textiles

Only one cloth for maximum hygiene and optimal loading performance of your cleaning textiles

### Strong

Washing power thanks to special formula

### Chemicals

all inclusive in one cloth

### Safe

no over- or underdosing

### Environment

biodegradable, no microplastic

EU ecolabel conform

designed by Avet in Switzerland  
made in Germany / Europe

## FACTS

- Patented system for washing and loading wiping textiles.
- Dry load after the washing and drying process.
- Just add water and clean
- Very high laboratory-tested cleaning performance
- Exact and process-optimized loading in the washing machine
- High occupational safety and health
- Germ-free storage
- Can be integrated into existing processes
- Simplest instruction and introduction of cleaning personnel
- All with **a single** ClaraClean® Wash&Go! Cloth

ClaraClean<sup>®</sup>™

**WASH & GO!**

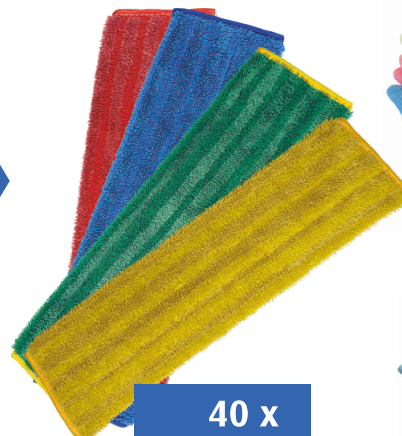

## The future technology of dry pre-impregnation

ClaraClean<sup>®</sup> Wash & Go! is the only cloth system for simultaneous washing and pre-preparation of modern cleaning textiles. Activation for cleaning with normal tap water only. Innovative, sustainable and patented.

**1 x Wash & Go!**

**40 x**

ClaraClean<sup>®</sup> mop

**or 80 x**

ClaraClean<sup>®</sup> Professional

**or 100 x**

ClaraClean<sup>®</sup> ClubLine

### Advantages:

- Massive reduction of detergents (100%) and cleaning chemicals (80%)
- Cost reduction
- Reduction of workload
- Sustainable system
- Process control
- Improvement of washing performance
- Improvement of cleaning quality
- Simple logistics, 1 Wash & Go! box corresponds to 4 x 10 canisters of liquid detergent and cleaning chemicals

**ENVIRONMENTALLY FRIENDLY - ECOLOGICAL - SIMPLE**

ClaraClean<sup>+</sup>

# WASH & GO!

## A revolutionary technology

### Cleaning achieves a new dimension

Textile-oriented cleaning. First-time combination of state-of-the-art microfibers with fast wetting surfactants.

### Principle

Surfactants are the main components of thorough and hygienic surface cleaning. They are embedded in the microfibers during the washing process. With the drying process, they become firmly embedded in the textile.

The dry cleaning textiles can be stored germ-free for several weeks or months.

The microfibers are activated only with normal tap water right before cleaning.

### Benefit

No layer build-up on surfaces. Reduced back soiling. Simplified and on-demand logistics. Environmentally friendly. EU Ecolabel compliant.

### Cleaning performance

Up to 80 m<sup>2</sup> cleaning performance with one ClaraClean<sup>®</sup> floor textile

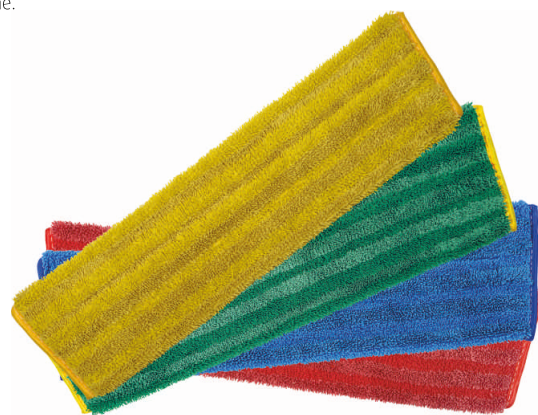

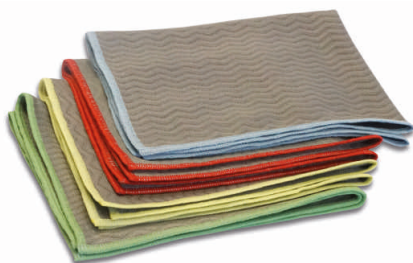

### Lifetime floor textile\*

1100 wash cycles (88,000 m<sup>2</sup>)

### Lifetime surface textile\*

250 wash cycles

\*) If the washing specifications are observed and the surfaces are smooth. The use of disinfectants or other aggressive cleaning agents can massively reduce the lifetime.

## Wash & Go! Eco cloths

### Wash & Go! UNIVERSAL

Equipment for optimal cleaning of general surfaces and floors.

#### Packaging unit:

Box with 20 pieces Wash&Go! cloths  
Box with 50 pieces Wash&Go! cloths

**PH-value:** 11,0

### Wash & Go! SANITARY

Equipment for optimal cleaning in the sanitary area. Sinks, showers, toilets.

#### Packaging unit:

Box with 20 pieces Wash&Go! cloths  
Box with 50 pieces Wash&Go! cloths

**PH-value:** 2,8

### Wash & Go! NEUTRAL

For optimal washing of all types of mop covers. Cloth with special dirt-trapping equipment for a clean cleaning textile.

#### Packaging unit:

Box with 20 pieces Wash&Go! cloths  
Box with 50 pieces Wash&Go! cloths

**PH-value:** 7,0
