

PARADISE POWER POWDER

The natural way to a radiant, fresh toilet.

Paradise Power Powder is a probiotic cleaning agent for wet areas. The result of cleaning with this innovative and environmentally friendly product goes beyond just cleanliness. Thanks to the enriched beneficial bacterial strains, a healthy microbiome is established on the surfaces.

Unlike conventional cleaning agents that have a short-term effect, probiotic cleaning agents remain active on surfaces after the application. The microorganisms continue their cleaning activity by continuously breaking down dirt and combating unpleasant odours.

Experience the extremely easy and safe application of Paradise Power Powder for yourself.

REQUEST SAMPLE

A study found that cleaning with probiotic cleaning agents in hospitals reduces the amount of common environmental microbes compared to disinfection and cleaning with conventional cleaning agents (Klassert T.E. et al., 2022).

“The most interesting effect observed from the probiotic cleaning regimen was a significant reduction, particularly in those antibiotic resistance genes found in the multi-resistant MRSA bacteria.”

Prof. Dr. Hortense Slevogt
Team leader at the Friedrich-Schiller University Jena

Benefits of probiotic cleaning products:

Displace unwanted and odour-causing bacteria

They have no negative impact on humans, animals, the environment, or surfaces

They facilitate cleaning by producing enzymes that enhance the cleaning effectiveness of the product
